

control panel platform  
DC control panels

Applicable to doors  
folding · sliding · swing · sectional

# CONT-R10

DC control panel

## In line with European standards

A new generation of control panels designed and prepared to meet the requirements of standard EN 13241-1: 2003 for industrial, commercial, garage doors and gates, with special emphasis on Safety in Use of Power Operated Doors as per European Standard EN 12453.

## Design

Pleasantly-shaped, waterproof and practical boxes. With space for wiring and motor capacitor.

## Versatile panels

An extensive, powerful range of panels for applications in shops, residential garages, large and small communities and industry, etc.

## Optimum reliability

The careful selection of components and thorough tests carried out under real conditions of use ensure optimum installation reliability.

## Time-saving and greater precision

Digital programming provides faster and more precise adaptation and programming of the panel to suit any type of door. No more than five minutes are required for the entire programming.

CONTROL PANELS

CONT-R10

- Operating panel for 24 V dc motors on sectional, swing, folding and sliding doors for residential and communal use.
- Operations by time or by pulses (HALL sensor).
- Reference search function.
- Independent time adjustment for opening/closure.
- Automatic standby time adjustment.
- Run stress learning or self-learning and stoppage due to excess consumption (collision or mechanical stop).
- Adjustable excess consumption detection sensitivity.
- Can operate in automatic and semi-automatic (with no automatic closure) mode or in dead-man mode (using buttons or by radio).
- Option switch to select automatic closure, dead-man operations, no reverse on opening and gentle stoppage, among others.
- BACK JUMP function on opening and closure.
- Pedestrian opening.
- Connector for function and diagnosis programmer (PROGMAN).
- Status display by SAFETY and ERROR LEDs.
- 868 MHz receiver with 15 codes built in.
- Active input switch. Safety inputs not used do not have to be bridged.
- 0-12-24Vac panel power supply.
- 0-12-24Vdc/100VA or 15VA transformer (supplied separately).
- Max. motor power of 24Vdc/100VA or 15VA (depending on the transformer).
- 868 MHz Motion receiver with 15 codes built in.
- Digital operating time programming or self-programming.
- Start, open/close and stop button input.
- Power ON light indicator.
- NPN-type 5Vdc inlet for encoder or Hall sensor connection (+, SH,-) required for pulse operations.
- Security contact connection close.
- 24Vac output (max. 400mA).
- Voltage-free outlet for courtesy light contact max. 100W at 230Vac (operating time + 30 seconds).
- Voltage-free outlet for flashing signal light contact, max. 250Vac/12A.
- Removable connectors.
- Unboxed.
- Dimensions: 100 x 100 x 27 mm.
